

Mathematica's Transforming Episode Accountability Model (TEAM) Analytics and Program Support

We offer data analytics, financial prediction tools, and program support so that your hospital can confidently navigate TEAM and make informed, strategic decisions.

Is your hospital ready to meet the challenges under the new model?

- Navigate the black box of episode methodology, program data, and reporting requirements
- Understand drivers of high-cost episodes and identify opportunities for cost savings
- Forecast future target prices and reconciliation results to improve financial predictability

Mathematica's Solution

- / **Projected target prices.** Estimated target prices and risk adjustors available months before they are released by CMS.
- / **Insights into high-value partners.** Identification of low-cost, high-quality surgeons and post-acute care providers to inform gain-sharing negotiations and post-acute care referral lists.
- / **Episode analysis and benchmarks.** Episode utilization, cost, and quality trends along with peer hospital benchmarks to identify opportunities to improve efficiency and outcomes.
- / **Reconciliation prediction.** Monthly estimates that use your current year performance and national trends to predict future reconciliation results.
- / **Program support.** Education on program methodology and policy changes and assistance navigating CMS data files and reporting requirements.
- / **Validation and appeal support.** Validation of CMS-provided target prices, risk adjustment, episode costs, quality scores, and reconciliation results. Our team can also assist with submitting technical assistance requests and reconciliation appeals to CMS when errors are identified.

Why Mathematica?

- ✓ **Deep experience.** For the past 13 years, Mathematica has supported CMS in the operations of episode-based bundled payment models and provided analytic and program support to hundreds of participants in these programs.

Customized solutions. Our policy and data experts can help identify targeted solutions that align with your organization's unique goals and challenges.

- ✓ **Extensive data access.** We have access to 100% Medicare FFS claims and enrollment data that enable us to replicate TEAM methodology.
