

■ Why choose Clarify and why we are different

Get ahead of CMS TEAM with Clarify

Smarter insights. Earlier preparation. Stronger Performance.

Clarify Health is redefining how hospitals prepare for CMS's Transforming Episode Accountability Model (TEAM) with exclusive QE data, AI-powered benchmarking, and hands-on support to help you manage risk, optimize care, and lead the shift to value before competitors even start.

Why the field chooses Clarify over the rest

Risk-Adj. Targets at the Cost Driver Level to make opportunities to reduce cost **actionable** (e.g., SNF targets, readmissions targets)

Convener-Grade Platform to deliver everything from analytics, to provider contracting to funds administration, all through a single solution.

Qualified Entity (QE) Data Advantage to assess financial exposure now, well before the January 2026 performance year

Additional Differentiators:

- **AI-powered Analyses** pinpoint key drivers of variation, eliminating the need for manual data exploration. Think ChatGPT but for CMS TEAM.
- **Pivot-Table Functionality** allows users to dynamically interrogate the raw data in real-time. Gives users greater flexibility to answer ad-hoc questions.
- **Provider Contracting, Program Administration and Distribution of Funds** to help manage provider contracting, CMS reporting requirements, and gainsharing payments to downstream providers, reducing operational burden so your team can stay focused on cost reduction initiatives.

Financial Summary by Episode Type and Quarter

TEAM - Episode Type	Total Volume	PY 1	Target	Difference to Target
Summary	1,616	\$45,750	\$43,617	\$2,134
> Spinal Fusion (Inpatient / Outpatient)	218	\$48,519	\$45,694	\$2,825
> SHFFT (Inpatient)	286	\$53,216	\$48,653	\$4,563
> Major Bowel Procedure (Inpatient)	394	\$39,474	\$38,762	\$712
> LEJR (Inpatient / Outpatient)	421	\$40,608	\$36,374	\$4,234
> CABG (Inpatient)	297	\$52,143	\$53,949	-\$1,806
